mirek wrote on Fri, 17 November 2017 09:15 Makes sense, implemented:

CodeEditor::WordWrap

Thanks!  
I tried

.WordWrap(true)

and even false, but the text continue to stay on the same row overcoming the right border window. Should I use it with someother option? At moment my codeeditor is in the right side of a splitterctrl.

Even WordwrapComments that is set in thelde seems do not work.

Thanks,  
Luigi
