Hello Oblivion,

>I have good news and (somewhat) bad news: TOR is on my todo list (with WEBDAV, OAuth2, etc...), but it isn't an easy-to-implement protocol.

Good news: FileZilla has a build in (general) Proxy server, which can be used by TOR

See <https://forum.filezilla-project.org/viewtopic.php?t=1398> and
<https://forum.filezilla-project.org/viewtopic.php?t=283>

Greetings Jan Marco
