Subject: Console app: Pressing any key does not close window!

Not sure if any one logged the following U++ feature. When a U++ console app has finished processing, one is prompted to close the window by pressing "any key". Unfortunately this doesn't work with the exception of pressing the enter key. Maybe this message should be updated, or the code for exiting the console app updated? Anyways, here's the code followed by a screen shot.

Code:

```
#include <iostream>
#include <iostream>

int main(int argc, const char *argv[])
{
 std::cout << "Go ahead and press any key!" << std::endl;
 return 0;
}
```
