Hello,

It seems that the compiler cannot generate operator= for some reasons. The following solution should fix your compilation problem:

```
Relazione &Clear() { f = {}; return *this;}
```

```
// or
```

```
Relazione &Clear() { f = RelazioneFormat(); return *this;}
```

If I will know more about this issue I will let you know. It would be good if you will migrate your code base to English :) However, I understand a lot from your current code.

Sincerely,
Klugier
