Hi Omari,  
thank you for your prompt answer.

Do you know if it is possible to use a function of a namespace with THISBACK?

My utilities library is defined as a namespace named util.  
When I use the following syntax:

```
buttonExport.WhenPush = THISBACK1(util::ExportCSV, Jobs);
```

I got from the compiler Error C3083, Error C2039, Error C2065.

So I had to define a method:

```
void JobList::Do_export()  
{  
    util::ExportCSV(Jobs);  
}
```

And then assign that method to the button:

```
buttonExport.WhenPush = THISBACK(Do_export);
```

Regards,  
Giorgio
