Subject: Re: Custom Build Steps to generate .cpp files and then compile
Posted by busiek on Wed, 17 Jan 2018 07:58:29 GMT

Forget it. It is working, now. I made mistake in the part "Output file(s):". TheIde is great :)

For your information I am trying to use tensorflow inside Ultimate++, but it is hard. For instance both libraries provide LOG macro and you have to separate code carefully to different source files.
