Dear Honza,

I would like to thank you for your grate work for U++ community. You have done outstanding job in the last 8 years. Personally, I have never used your package, but the existence of them is very important for us and our users.

I think we should move to Snap and/or Flatpack in the future. It is easier to maintenance, between distributions and is more portable solution. Just like our Windows distribution. This is the good moment to re-investigate our market strategy.

At the end - thank you for this outstanding contribution over the last 8 years. I would like to wish you good luck in your personal and profession life. I hope you will never forget about us.

---

In addition, Honza outage will not have any impact on the further development cycle or bug fixing activity. He is not active developer since I remember. The only lose is that he gave fantastic support on our forum and he created packages for Ubuntu.

Sincerely,  
Klugier
