Well, finally I found the problem. I have a bunch of assignment like this:

```
strLav3D <<= vcodbob[listaMetri];
```

Now I changed the using .SetData:

```
strLav3D.SetData(vcodbob[listaMetri]);
```

And the program compiles. Weird thing, on Windows it compiles in any case. Furthermore, about 6 months ago the same application compiled with no problem on Linux, maybe there was an older gcc version.

Thanks to all.
