mt dew3q wrote on Sun, 25 February 2018 06:10Hi-

Just quick question:

Sometimes .exe won't launch. Only thing I can think of is cutting and pasting code from web into the editor. Could that cause it?

If I start over with code and do brand new project, I can get dialog to run, but if in middle of project, sometimes it seems like gremlins.

Please let me know if it ever happens and if there are any tricks.

thx. -
mt dew3q

This is not normal.

Cannot help without more details though.
