Hi-

I'm wondering about these mixed environments. Not sure about MinGW. If the code is copied from the tutorial, maybe I did something to the environment.

I will run some commands to see how much space I have in linux with VBox. If I have the space, I will work on getting linux ready tonight.

I will report back to let you know how I made out in linux. I'd like to report better results in anything even though I had hoped for using windows tools.

thx.- mtdew3q
