"nickname":"\u6728\u5076"

Depends on where "\u6728\u5076" comes from.... Usually you cannot use that literal with compiler directly.

Anyway, to get such string in U++, you can try:

WString s;
s.Cat(0x6728);
s.Cat(0x5076);

then maybe

String utf8 = s.ToString();
