```
class StaticText : public Ctrl, public LabelBase {
public:
    virtual void  Paint(Draw& w);
    virtual Size  GetMinSize() const;
    virtual void  LabelUpdate();
    virtual void  SetData(const Value& v)          { SetText((String)v);}          // <<---
    virtual Value GetData() const                { return GetText();}          // <<---

public:
    StaticText& SetFont(Font font)               { LabelBase::SetFont(font); return *this; }
    StaticText& SetInk(Color color)              { LabelBase::SetInk(color); return *this; }
    StaticText& SetAlign(int align)              { LabelBase::SetAlign(align); return *this; }
    StaticText& SetImage(const Image& img, int spc = 0) { LabelBase::SetImage(img, spc); return
*this; }
    StaticText& SetText(const char *text)        { LabelBase::SetText(text); return *this; }

    StaticText& operator=(const char *s)        { SetText(s); return *this; }

    StaticText();
};
```
