I get an "attempting to reference a deleted function" error compiling the following.

With VectorMap it compiles, with SortedVectorMap it fails.

Adding MyClass::operator= and copy ctor doesnt help.

Compiler: MSC15x64

```
#include <Core/Core.h>
```

```
using namespace Upp;
```

```
class MyClass : Moveable<MyClass>
{
    int nDummy;
};
```

```
CONSOLE_APP_MAIN
```

```
{
    Vector <MyClass>          List;
    SortedVectorMap <String, Vector<MyClass>> Info;
```

```
//VectorMap <String, Vector<MyClass>> Info; // THIS COMPILES
```

```
Info.Add("123", List); // <- fail
}
```

Produces:

```
c:\upp9251\uppsrc\core\InVector.h(629): error C2280: 'Upp::Vector<MyClass>
&Upp::Vector<MyClass>::operator =(const Upp::Vector<MyClass> &)': attempting to reference a
deleted function
```
