Subject: how to broadcast in AsyncWebSocket?
Posted by akebee on Sun, 08 Apr 2018 13:11:30 GMT

I can "t quite understand the reference/AsyncWebSocket
i dont know how to broadcast to clients in this example

it seems that the Array<Worker> worker represent connections.
so the broadcast is

```
  for(int i = worker.GetCount() - 1; i >= 0; i--)
  {
   Worker& w = worker[i];
   w.ws.SendText("broadcast........");
  }
```
