Though there is one problem

```
void maintradetesterwindow::WithdataLayoutEx::DragAndDrop(Point p, PasteClip& d)
{
    if(IsDragAndDropSource())
        return;
    Ctrl* c = GetDragAndDropTarget();
    DUMP(c);
    if (c!=nullptr)
    if (c==&m->datasource_info.analyse)
    {
        if(AcceptFiles(d)) {
            Vector<String> files2 = GetFiles(d);
            m->analyse_a_file(files2[0]);
        }
    }
}
```

c is always null... I thought I could use to know where files are dropped.
