Hi,

Msc builder ignores compiler field...mingw does not.

The fix of this in mscbuilder.cpp:

```
String MscBuilder::CmdLine(const String& package, const Package& pkg)
```

```
{
    String cc;
    if(HasFlag("ARM"))
        cc = "clarm";
    else
    if(HasFlag("MIPS"))
        cc = "clmips";
    else
    if(HasFlag("SH3"))
        cc = "shcl /Qsh3";
    else
    if(HasFlag("SH4"))
        cc = "shcl /Qsh4";
    else
    if(HasFlag("MSC8ARM"))
        cc = "cl -GS- ";
    else
        cc = HasFlag("INTEL") ? "icl" : "cl";
    if (!IsNull(compiler)) // THIS IS THE FIX INSERT THESE TWO LINES
        cc = compiler; // THIS IS THE FIX

    return cc;
}
```
