Hello,

AnsiParser package is updated.

It contains a GUI example which demonstrates a simple passive display capable of parsing SGR (select graphic rendititon) commands subset.

A screenshot of the AnsiParserGUI example:

You can find the updated package in the first message of this topic, or you can grab it from:

<https://github.com/ismail-yilmaz/upc-components/tree/master/Core/AnsiParser>

<https://github.com/ismail-yilmaz/upc-components/tree/master/Examples>

Best regards,

Oblivion
