Hi,

Can we add GetPeerAddr to WebSocket? Right now there is no function that returns client's address.
It is just single line in Inet.h:

```
dword  GetWaitEvents() const  { return WAIT_READ|(!!out_queue.GetCount() * WAIT_WRITE); }
SOCKET GetSOCKET() const      { return socket ? socket->GetSOCKET() : 0; }
String GetPeerAddr() const    { return socket ? socket->GetPeerAddr() : ""; } //<---- NEW LINE
```
