Hello,

SSH package and its examples are updated.
I highly recommend updating the package, since it contains a critical fix.

2018-06-15: Critical fix: SshChannel and SFtp data read and write methods fixed: The recently introduced socket wait mechanism was causing a constant I/O blocking. This is now fixed.
Cosmetics & cleanup.

2018-06-06: SshShell: Console loop fixed.

You can find the updated packages in the first message of this topic, or at the below git address:
