Hi

I am trying to compile [https://www.ultimatepp.org/reference\\$SignPDF\\$en-us.html](https://www.ultimatepp.org/reference$SignPDF$en-us.html) example.

I am getting following error for both MinGW and MS compiler Linking Failed

uppsrc/Core/SSL/SSL.h:10: undefined reference to `Upp::SSL__initializer()'

uppsrc/Core/SSL/SSL.h:11: undefined reference to `Upp::SSLSocket__initializer()'

uppsrc/Core/SSL/SSL.h:12: undefined reference to `Upp::P7S__initializer()'

I am missing out something in setup.
