mdelfede wrote on Mon, 30 July 2018 09:12Hi,

Trying to compile a big source tree I found a template that brings problems : IsEqual(T&, T&)
The template is inside "obsolete.h" file in Core, which should be disabled using NODEPRECATED
build flag.
Trying it I get tons of compiler error inside Core.

Is it still "work in progress" ?

Ciao

Max

Yes, something I planned to do, but did not.

Anyway, thanks for poking me, Core should be now cleansed (means, it compiles with
NODEPRECATED flag).
