luoganda wrote on Sun, 12 August 2018 10:22 When hovering over a regular Button in DockWindow (and DockWindow is detached like on pic), there is that highlightFrame bug, but when that same Button is hovered in DockWindow (in a dockable state) it's drawn like expected.

Other controls seem to be drawn as expected when hovered - docked or not.

That Button hover highlightFrame bug is also the same, when mouse goes out of control - that frame bug is exactly like when 1stTime hoveredOn.

See attached image.

This looks like the window does not have background painted...

Testcase?
