Hello Klugier,

Thanks for you quick reply !

Here is some screen of both upp I tried(through it could be a problem of version but no it's not)
I also join a screen of TheIDE Trying to compile "Example/Clock". The problem is the same, after
ChGtk.cpp
Compilation stop with "There were errors".

I also try to install some other Ide like codeBlock using there ".msi"
but it didnt fix the problem it seems like mingw is not working properly (32 or 64 bits).

thank you in advance.

Have a good day !
