Subject: Compile Error on Windows 10

Hi, everyone. I am a newbie on Ultimate++.

Today I had my first try on this framework, but even the tutorial program fails to compile. I always get compile errors within the library, like "wchar does not name a type" etc. I thought that problem might be on my compiler (which is MinGW-w64 7.2.0), so I tried the 7z package with mingw, but the problem still exists. I'm desperate now. Anyway, I suppose that I really shouldn't get that many error messages.
