When I try to run CEF in debug mode it looks exactly like in your picture and there is message in debug.log:

```
[0904/100200.169:FATAL:scoped_com_initializer.cc(33)] Check failed:
((HRESULT)0x80010106L) != hr_ (-2147417850 vs. -2147417850)Invalid COM thread model
change
[0904/100200.179:VERBOSE1:node.cc(439)] Observing lost connection from node
FCBAD2A60A1D426E.E7332D5EC813F6CF to node 706089DCC5A53A87.D10E83B69B119B88
[0904/100200.179:VERBOSE1:browser_gpu_channel_host_factory.c c(145)] Failed to create
channel on existing GPU process. Trying to restart GPU process.
```

I got rid of this error by uninitialized COM in child processes. Unfortunately picture is still white and there is another assertion in log:

```
[0904/163239.008:FATAL:dwrite_font_proxy_init_impl_win.cc(88 )] Check failed:
fallback_available == base::win::GetVersion() > base::win::VERSION_WIN8 (1 vs. 0)
```

I hope this thread will help me to solve the problem:
