Subject: Debugging long Strings
Posted by koldo on Fri, 09 Nov 2018 07:11:14 GMT

Hello all

Now I find difficult to debug long Strings. For example, full paths.
Currently the Strings are trimmed, so AFAIK the only way to debug is to LOG them.

Would it be possible to debug long Strings or, at least, to Copy them (Ctrl-C) to Notepad to analyse them?

Thank you.
