fermium wrote on Thu, 08 November 2018 11:15What about IsCached()?

```
template <class T, class K>
bool LRUCache<T, K>::IsCached(const Maker& m)
{
    Key k;
    k.key = m.Key();
    k.type = &typeid(m);
    int q = key.Find(k);
    if(q < 0)
        return false;
    else
        return true;
}
```

Not fundamentally oposed, but I would really like to know what is the real life usage?
