I get the errors

/home/luigi/upp/uppsrc/Core/ValueUtil.h (87): error: expected unqualified-id before '=' token

/home/luigi/upp/uppsrc/Core/ValueUtil.h (88): error: expected unqualified-id before '=' token

on lubuntu 18.10 and nightly build 12599. Theide was compiled with version 11393, but I think this should not be a problem.

Is this a known problem or it is my machine the need a review?

Thanks,
Luigi

I have tried lubuntu 18.10 with latest nightly and it seems to work fine.

I am sorry for my bad quote. The problem appeared on a recently updated 18.04. However it seems resolved in the new version.

Thanks,
Luigi
