Novo wrote on Tue, 11 December 2018 20:09Tried to copy your precompiled app into Application - it won't event launch because it requires macOS 10.14 (can be launched from command line). Tried to copy my recompiled app into Application - menu works, but keyboard (at least command-m) doesn't.

Keys issue should be now fixed in trunk. (I forgot to implement menu hotkeys at U++ side with Cocoa menus...)
