Ok,  
Something like this?

This is a modified version of upp/reference/DockingExample: (  
[https://www.ultimatepp.org/reference\\$DockingExample1\\$en-us.html](https://www.ultimatepp.org/reference$DockingExample1$en-us.html))

Add the below code (no any other alterations needed):

```
virtual void Paint(Draw& w)
{
    DockWindow::Paint(w);
    w.DrawRect(GetSize(), Gray());
    w.DrawImage(GetSize() / 2, CtrlImg::reporticon());
}
```

Is this what you need?

Best regards,  
Oblivion
