Tom1 wrote on Thu, 10 January 2019 17:26Hi,

Thanks! I will check this too tomorrow!

Anyway, if this does not sort out easily, I can store the problematic sequence in a Painting and serialize it in a file for you to check out. (The same procedure as last time, when there was a complex Painter issue.)

Thanks,

Tom

Yes, good idea.

Also, if my code change does not solve the problem, try this:

```
void BufferPainter::CharacterOp(const Pointf& p, int ch, Font fnt)
{
    LLOG("@ CharacterOp " << p << ", " << ch << ", " << fnt);
    #if 1
        DoMove0();
        PaintCharacter(*this, p, ch, fnt);
    #else
        move = current = EndPoint(p, false);
        auto& m = PathAdd<CharData>(CHAR);
        m.p = EndPoint(p, false);
        m.ch = ch;
        m.fnt = fnt;
        path_info->ischar = true;
        EvenOdd();
    #endif
}
```

(It is similar - removing caching - just on another level)
