## Subject: Re: MT + Subpixel appear incompatible in Painter
Posted by Tom1 on Fri, 11 Jan 2019 08:16:33 GMT

Hi,

That's fast! Now with sub-pixel enabled, MT gives a performance boost of 4.4 compared to ST. So, on my current hardware (Core i9-9900K, 8C16T) the performance difference between AA and sub-pixel is only 12 % in favor of AA. Beautiful!

(While this is unlikely to be important, the NoAA on MT is terribly slow. AA and NoAA is on par on ST.)

Thanks and best regards,

Tom
