

Could you add these DLOGs

```
struct GlyphKey {
    Font fnt;
    int chr;
    double tolerance;

    bool operator==(const GlyphKey& b) const {
        DLOG("*** operator==");
        DDUMP(fnt);
        DDUMP(b.fnt);
        DDUMP(chr);
        DDUMP(b.chr);
        return fnt == b.fnt && chr == b.chr && tolerance == b.tolerance;
    }
    unsigned GetHashValue() const {
        return CombineHash(fnt, chr, tolerance);
    }
};

struct sMakeGlyph : LRUCache<Value, GlyphKey>::Maker {
    GlyphKey gk;

        int sz = gp.glyph.GetCount() * 4;
        v = RawPickToValue(pick(gp.glyph));

    }
};

```

then bring it into error state, send me the screenshot and .log?

Thanks,
