That said, can use perhaps send me the log? And maybe tell me what letter was missing, which word it was part of, perhaps estimate what font it should have been...

Mirek

I tried this in DEBUG mode and the everything seemed to be correct. I will now switch back to RELEASE and swap RLOG instead of LOG...

Tom

OK, now I was (and will keep, until you say otherwise) in RELEASE mode. Using RLOG. The problem appeared in letter 'a', in words like "Rajanummi" or "Nummela". Font is Arial, size likely 37..38, I guess.

BR, Tom
