MiltonLtormer wrote on Wed, 20 June 2018 06:40I am Milton. I am a new user on this forum. I have got some idea on the U++ from this forum. Still I have to know much more. Can anyone help me by providing steps to download and install U++? Please specify whether it is compatible with all operating systems?

Hi Milton , I am new to the forum too. The forum is not very active but for the sake of completeness can you please expand the term 'all operating systems' ? The most common is Linux, Windows and Mac Os X, but Android support is advanced as koldo stated.

I downloaded the sources and did the 'make & make install' under debian stretch and it compiled smoothly and I could run TheIDE.

May be this encourages other newbies as me to do the same.
