Novo wrote on Sat, 16 February 2019 00:14I'm trying to implement SUBJ in my app, but I'm always getting a Help --> Search submenu, which I didn't ask for, and I do not need. My own Help --> About submenu doesn't work, I guess, because of this "Search" stuff.
You managed to disable this "Search" in TheIDE somehow, but I couldn't figure out how ... :)
Could you please share your secret with me?

Hard to say :)

I believe that they are adding those unwanted items based on menu name. For starters, try to rename Help to something else...
