unodgs wrote on Fri, 06 January 2006 06:44Fudamin could you add 'yesterday messages' button? I've found today messages very useful but very often I just need to check if anything was written yesterday. Or add a combo with items ' show messages 1 day old', '2 days old' and so on...

use Message Navigator. You can have messages from any interval.

BTW: In user mode tables are still no resized to the full window width (when user is not logged in they are, but with this ugly colors..)

Colors is a question of taste - that's why I've made a choice of Themes in User CP->Settings .

Do you mean the resizing doesn't work in that ugly gray mode?

BTW, which browser do you use?
