Novo wrote on Fri, 15 February 2019 13:04Yet another tiny but extremely annoying thing: Control + trackpad click isn't handled. That makes using of contextual menus practically impossible. One basically needs to use an external mouse with MacBook.

Any suggestion how to fix this?

The problem is that Ctrl+Left Click (or Alt+Click as these are logically reversed) has valid meaning, so I am not sure that simply calling right click there is a good idea...
