koldo wrote on Sat, 16 February 2019 17:54I wanted to know the right U++ container for this.
Data type could be int or double.

```
Container<Data type> dat;
```

```
dat.SetCount(300);  
dat[23] = 12;  
dat.FindAdd(34);  
Thank you.
```

I would be helpful if you have explained what is supposed to happen at each point. Esp. what you expect from SetCount and FindAdd...

(But in general, I would say use Index. That really IS Vector with search...)
