This is a patch!
Check previous posts for more!

Some fixes/addedCode:
* winXp: output newline bug
* comport interPlugin updated - also 0 terminating reading added and to view as hex-8/16
* rewrite subst func to properly get whole strings of any gfx property - previous " bug in string
* project dialog updated
* exporting any suitable when project used by 'Export' button, optional main file(flagged) is called last
* $<childtab> prop added - check Help for more at Snippets section, setVectorChild direct name bug fixed
* needed esc func added
* BakeASite projects samples added, one with own script - which can also be used as a template for other prjs
* ...

Yet to do:
-undo in gfx
-wideString output(does std:: support wideRe?), mainly if nonAnsi characters used in a path
