Hi everyone,

I have a tray icon with a list of items and one of them is also a list like this :

I would like to be able to click on the 1st Pause.

```
bar.Sub(true, "Pause", THISBACK(PauseMenu));
```

```
void AOO::PauseMenu(Bar& bar) {  
    bar <<= THISBACK(BreakOut);  
    bar.Add("Pause", myFuncBreak);  
    bar.Add("Réunion", myFuncMeeting);  
}
```

This isn't working and if i call BreakOut() in PauseMenu() then the event/function is fired when submenu pop-out.

Any suggestion, idea or clues is welcome.

Regards,

Qwak
