Hi everyone,

I have a tray icon with a list of items and one of them is also a list like this :

I would like to be able to click on the 1st Pause.

bar.Sub(true, "Pause", THISBACK(PauseMenu));

```
void AOO::PauseMenu(Bar& bar) {
 bar <<= THISBACK(BreakOut);
     bar.Add("Pause", myFuncBreak);
     bar.Add("Réunion", myFuncMeeting);
}
```

This isn't working and if i call BreakOut() in PauseMenu() then the event/function is fired when submenu pop-out.

Any suggestion, idea or clues is welcome.

Regards,

Qwak
