I've set the compiler to use c++17 and last errors are gone but I got some new ones.
so it looks like this right now:

```
1>----- Build started: Project: HW, Configuration: Release x64 -----
1>main.cpp
1>c:\users\canis\dropbox\cpp\upp\uppsrc\core\json.h(4): error C2445: result type of conditional
expression is ambiguous: types 'const char [5]' and 'Upp::String' can be converted to multiple
common types
1>c:\users\canis\dropbox\cpp\upp\uppsrc\core\json.h(4): note: could be 'const char *'
1>c:\users\canis\dropbox\cpp\upp\uppsrc\core\json.h(4): note: or      'Upp::String'
1>c:\users\canis\dropbox\cpp\upp\uppsrc\core\json.h(5): error C2445: result type of conditional
expression is ambiguous: types 'const char [5]' and 'Upp::String' can be converted to multiple
common types
1>c:\users\canis\dropbox\cpp\upp\uppsrc\core\json.h(5): note: could be 'const char *'
1>c:\users\canis\dropbox\cpp\upp\uppsrc\core\json.h(5): note: or      'Upp::String'
1>Done building project "HW.vcxproj" -- FAILED.
===== Build: 0 succeeded, 1 failed, 0 up-to-date, 0 skipped =====
```

And this is my project in zip file: <https://www.dropbox.com/s/c25kyrfox9u1rd1/HW.zip?dl=0>
