omari wrote on Sun, 17 March 2019 13:52This is the Win32 version.

trying to test it on linux and with a bit of investigation, i found that
the Linux version is as easy as

```
void WriteClipboardHTML(const String& html)
{
 WriteClipboard("text/html", html);
}
```

(tested on Ubuntu/ Gnome)

I dont have a MacOS machine, then i have not tested it.

Well, maybe that one would work in win32 too? :)
