Hello,

I am experiencing a weird behavior (under X11 mode). The menu has an additional Search ctrl that I haven't coded.

See picture:

This is the code

```
void VegaMain::VegaMainMenu(Bar& menu)
{
    menu.Add(t_("File"), THISBACK(File) ).Key(K_CTRL_F);
    menu.Add(t_("Standing"), THISBACK(Standing) ).Key(K_CTRL_X);
    menu.Add(t_("Extras"), THISBACK(Extras) ).Key(K_CTRL_X);
    menu.Add(t_("Rating Report"), THISBACK(ReportCB) ).Key(K_CTRL_R);
    menu.Add(t_("Help"), THISBACK(Help) ).Key(K_CTRL_H);
}

//....
// and then
//....
void VegaMain::Help(Bar& bar)
{
    bar.Add(t_("Content"), THISBACK(HelpContent));
    bar.Separator();
#ifdef PLATFORM_LINUX
    bar.Add(t_("Register ..."), THISBACK(HelpRegister));
    bar.Add(t_("Registered to ..."), THISBACK(HelpRegistered));
    bar.Separator();
#endif
    bar.Add(t_("Check Update"), THISBACK(CheckUpdate));
    bar.Separator();
    bar.Add(t_("About"), THISBACK(HelpAbout));
}
```

Moreover all the items do not work, i.e. they do not perform any action.

The same code works OK under Windows and Linux.

Thanks,  
Luigi
