Solved! 8)

Removed XQuartz.

The problem was caused by the package "Office Automation" that in turn required the package "SysInfo".

It required a X11 library. The complain was caused just by this package. I have just removed SysInfo and the link arrived till the end.

There were many warnings. clang sometimes expected a struct instead of class or something similar.

So the problem was mine and not related to thief.

Sorry for the false alarm.

Thanks,
Luigi
