mirek wrote on Tue, 26 March 2019 08:18OK, I think I know how to disable this:

<https://stackoverflow.com/questions/22075413/remove-or-customize-search-from-help-menu>
<https://developer.apple.com/documentation/appkit/nsapplication/1428644-helpmenu?language=objc>

I will try this fix soon...

Mirek

If I use

```
menu.Add(t_("Help "), THISBACK(Help) ).Key(K_CTRL_H);
```

and then not use the "Help" word then the search ctrl disappear and the whole dropline works as expected. There is some collision with cocoa.
