https://stackoverflow.com/questions/22075413/remove-or-custo mize-search-from-help-menu https://developer.apple.com/documentation/appkit/nsapplicati on/1428644-helpmenu?language=objc

I will try this fix soon...

Mirek

If I use

menu.Add(t_("Help "), THISBACK(Help)).Key(K_CTRL_H);

and then not use the "Help" word then the search ctrl disappear and the whole dropline works as expected. There is some collision with cocoa.

Luigi

I have commited possible fix of the whole to the trunk.

Mirek
