Hello Oblivion,

TheIDE docs should be fixed - you need to recompile TheIDE for some reasons to notice the difference. Updating only .tpp file doesn't change anything. I hope it will be patched in tomorrow's RC build.

The problem is observed when you explicitly provide url for title in table of contents:
- `topic://ide/app/AndroidBuilder_en-us#9`

instead of:
- `#9`

And then you recompile TheIDE, so the problem is not visible under the first initial test.

Sincerely,
Klugier
