Hi,

after a ministorm of bugs and fixes, we are now at rc4.

<https://sourceforge.net/projects/upp/files/upp/2019.1.rc4/>

Thinks fixed and added:

- Support for Visual C++ / Build Tools 2019
- MacOS version does not require crypto.dylib installed to run theide
- Fixed issue in theide help (multiplying entries for topics with TOC)
- Mingw (and, in fact GCC and CLANG) now support "SO" compilation (compiles packages to .dll/.so/.dylib, this helps with linking speed)

Thanks for testing!

Mirek
